

High-quality products, first-class support and technical expertise

Company profile

NYCO is a worldwide-recognized manufacturer of synthetic esters and specialty lubricants for Aeronautics, Defence and Industry.

A French independent and privately-owned company, we are the sole European producer of aviation lubricants and experts in the development and manufacturing of high-performance synthetic ester base-stocks.

We provide solutions that are tailor-made to our customers' requirements and meet the most demanding specifications.

Our products

- Civil aviation lubricants
- Military lubricants compliant with international specifications
- Ground gas turbines lubricants
- Synthetic ester base stocks for lubricants, plasticizers, dielectric fluids
- Synthetic lubricants for industrial and automotive applications
- NYCOGREEN: environmentally-considerate and biodegradable offer

Our vision

« NYCO's ambition is to deliver solutions to our customers' today issues in a fast evolving world. We can achieve this by delivering high quality products, mostly tailored-made, with a first class customer support and technical expertise. Since the 1960s when we delivered the first solution to the Mirage fighter lubrication problems, we have been continuously investing in R&D to develop the most innovative products combining safety and environmental performance.

Our vision is to leverage our technical knowledge, our innovation-oriented mindset and our chemical manufacturing capability to be a global provider of solutions for the markets we choose to serve."

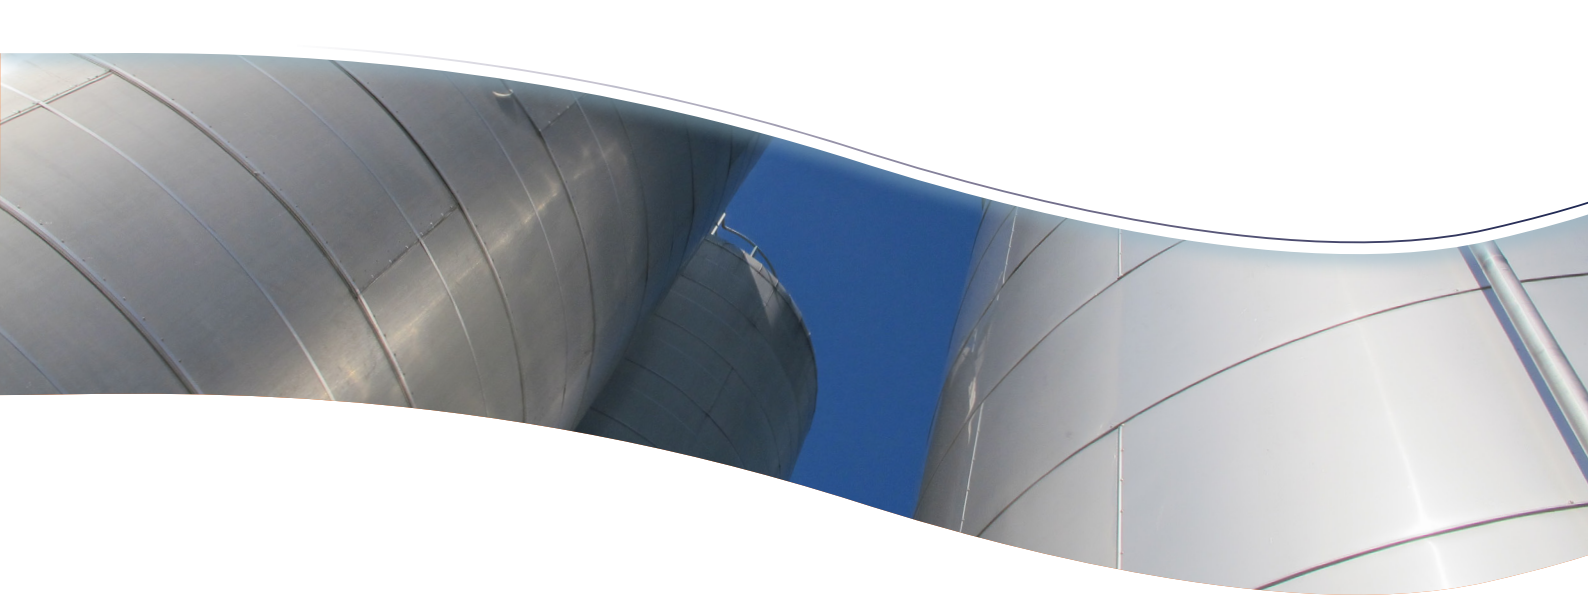

Eric Piveteau, General Manager

Facts & figures

- › 260 people
- › 2014 sales > 80 M€
- › 82% export sales to more than 100 countries
- › 3 production facilities in Belgium, Russia, India
- › Certified ISO 9001 & ISO 14001
- › 7 affiliates and offices around the world
- › Worldwide distributor/agent network
- › 2 500 formulas tested each year
- › Member of GIFAS and Aerochemicals

High performance lubricants and synthetic esters

Industry & Automotive

NYCO is a worldwide expert in the development and manufacturing of synthetic esters and ester-based lubricants for use by manufacturers of industrial & automotive lubricants (oil companies and independent lubricants manufacturers).

We offer to lubricant formulators valuable solutions to develop new lubricants that meet the ever demanding severity of operation & regulatory requirements: longer lifetime, higher temperature, better energy efficiency and environmental consideration.

Defence

Thanks to 60 years' field experience in military business NYCO offers a very broad range of lubricants for Air – Sea – Land forces requirements, tested and approved against demanding military and aeronautical specifications, as well as major equipment manufacturers.

Our 60 years of experience in military lubricants, since the pioneering in turbine oil development for the Mirage fighter, have enabled NYCO to become the n°1 and preferred supplier of military forces, with sales in over 100 countries.

We strive to provide the most extensive range of top quality products to our customers, at any time and at any location, to support any fleet regardless its country of origin.

Aeronautics

Offering a comprehensive range of oils and greases, corrosion preventives and other chemical solutions for commercial airliners, helicopters, regional aircraft and business jets, NYCO is a key partner for engine and aircraft manufacturers, aircraft systems OEMs, airlines and MROs around the world.

We offer lubricants manufactured to the highest standards as well as cost-effective and customized solutions to meet the need of our customers for high performance products.

Effective customer support is our priority.

A reliable and flexible logistic system designed for customer proximity

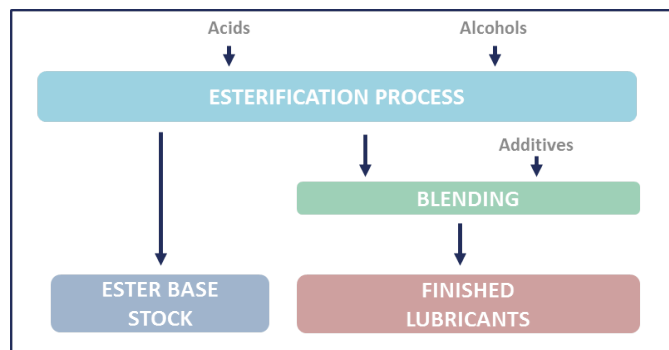

Our production plant in Tournai, Belgium is located at the cross-road of industrial and commercial routes. It can perform deliveries to more than 90 countries all around the world.

Built as a state of the art plant in 1997, it's a highly performing tool that has been extended twice to match market requirements.

Our plant quality management is built on aviation culture and we are committed to the highest quality standards in all our processes.

Mastering the processes, from synthetic esters production to finished lubricants
